

Electromechanical Door Solutions

We take the worry out of
protecting what's valuable to you.

Lockwood: *no worries*®

ASSA ABLOY

www.lockweb.com.au

Padde joins Lockwood

ASSA ABLOY has recently repositioned Padde by Lockwood into the Lockwood range with solus brand status. Padde is an Australian-based, niche range that has been supplying quality electromechanical door locking solutions since 1966. Whilst it was given the Lockwood hard endorsement in 2005, the move to new Lockwood branded packaging, part numbers and point of sale will allow Padde to further leverage Lockwood's brand equity allowing greater focus on marketing and R&D activities, whilst also bolstering and complementing the full Lockwood door hardware package across all market channels. The Padde product we know and love is not changing, simply becoming a full Lockwood branded offering.

CL-150S Cabinet Lock with Spring Release

The Lockwood CL-150S electric Cabinet Lock is a compact, versatile and flexible locking solution for Lockers, Cupboards, Drawers and a variety of applications using swing or sliding doors and drawers.

The CL-150S also provides a spring release function negating the need for handles on smaller lockers and cabinets as it pops open the door on release. The Cabinet Lock also includes Lock State Monitoring and 12 or 24VDC operation.

With a Holding Force of 100kg, the CL-150S is the ideal electric locking solution for a host of applications and can be used in conjunction with most Access Control, Intercom, Keypad or Card Reader systems. For added flexibility in different applications and door or cabinet styles, the compact locking mechanism and body also allows for the Strike Plunger to engage into either the Edge or the Top of the Lock body.

The CL-150S is suitable for use with University and School staff or student lockers, Hospital, Aged Care and Clinic medicine cabinets and drawers, Office and Retail display cabinets, Filing Cabinets and drawers and Post boxes, just to name a few.

Key Features

- Spring Loaded Release
- Lock Status/Plunger position Monitoring with NO/NC Output
- 12 or 24VDC Operation
- 100kg Holding Force
- Top or Edge Strike Plunger engagement
- Fail Secure configuration

Product Details

Voltage	12 or 24VDC
Current Consumption	920mA at 12VDC 450mA at 24VDC
Holding Force	100kg
Minimum Door Width	25cm from hinge to lock
Fail Secure	(PTO) operation only

CL-150S Cabinet Lock with Spring Release

Ordering Information

Part Number	Product Description
CL-150S	Lockwood CL-150S Cabinet Lock with Spring Release

Specification Statement

The electric Cabinet or Drawer lock shall be surface mounted and enable engagement of the Strike Plunger either into the edge or top of the lock body. The lock shall provide a Spring release function which pushes open the cabinet or locker door therefore negating the need for a door handle. The Lock shall provide Lock/Door Position Monitoring Output and a Holding Force of no less than 100kg.

EL110 Electric Cabinet Lock

The Lockwood Padde Series EL110 Electric Cabinet Lock is a compact, cast aluminium lock specially designed for cabinets having either swing or sliding doors. The Cabinet Lock can be surface mounted either vertically or horizontally and offers maximum flexibility for ease of installation.

EL110 can also be controlled by any existing access control system or simply controlled through a remote keypad or keyswitch. The EL110 is cost efficient, robust, easy to install and suitable for one or multiple cabinet applications.

Key Features

- Fail safe/fail secure changeable on site
- Flexible alignment: has a 5mm XY adjustment after installation
- Low current consumption: uses only 187mA @ 12Vdc
- Available in 12Vdc
- Self latching in fail secure mode
- Solenoid rated for continuous use
- 5 Year Tricare Warranty (Padde Series)

Applications

- Cabinet locking
- Swing or sliding cabinet doors

Product Details

Voltage	12Vdc
Current	187mA @ 12Vdc.
Solenoid	Solenoids are rated for continuous use
Monitoring	None
Strength	Holding force 150kg
Endurance	Cycle tested to 1,000,000 operations
Environment	Operational temperature range -20c to +60c
Body	Cast Aluminium Construction

Standards and Compliance

	CE Approved
	RCM Certified

Ordering Information

Part Number	Product Description
EL110-1	EL110 Cabinet Lock 12Vdc Fail Safe Non Monitored
EL110-2	EL110 Cabinet Lock 12Vdc Fail Secure Non Monitored

Specification Statement

The strike which is to be surface mounted and constructed of Cast Aluminium, should be self latching when used in fail secure mode. The lock must be capable of being changed from Fail Safe to Fail Secure on site. Lock alignment must be adjustable up to 5mm in both "x" and "y" directions both during and after installation. The lock should consume not greater than 187mA @12Vdc and have a solenoid rated for continuous use. Electrical certifications must include RCM mark.

ES110 Series Electric Strike

The Lockwood Padde Series ES110 is a cost efficient robust Electric Strike with a solid construction of one-piece Cast Aluminium body and Stainless Steel striker. Having a deeper than normal strike-keeper area, ES110 is designed to work with an extensive range of locks and offers the same level of security and reliability usually provided by more expensive electric locking solutions.

Extension lips are available to accommodate the installation of Electric Strikes on door frames with different thickness. The ES110 product range of patented Electric Strikes are suitable for use with all access control installations where flexibility, security and lower cost are required.

Key Features

- All models IP56 Weather resistant
- Fail safe/fail secure changeable on site
- Stainless steel striker for extra strength and durability
- Stainless steel locking pins
- Available in 12/24Vdc Multi Voltage
- Optional mounting kit
- Installation template
- Suitable For 18mm latch with a 3mm door gap
- 5 Year Tricare Warranty (Padde Series)

Applications

- Exposed areas
- High traffic areas
- Open in/open out doors
- Suitable for use with all access control systems

Product Details

Voltage	12/24Vdc
Current	243 mA @ 12Vdc - 187mA @ 24Vdc
Solenoid	Solenoids are rated for continuous use
Monitoring	None
Holding Force	680 kg Static Strength Rating
Endurance	Cycle tested to 1,000,000 operations
Environment	Operational temperature range - 20°C to + 60°C Weather resistant construction Standard (IP56)
Body	Cast Aluminium Construction
Keeper	Stainless Steel
Latch	Suitable for 15mm latchbolt with 3mm door gap

Standards and Compliance

Successfully fire rated up to 4hrs on fire door assemblies in accordance with AS1905.1.2005 (Part 1: Fire resistant door sets)

Approved to UL1034 (highest level)

CE Approved

RCM Certified

Weather Resistant (IP56)

ES150 Series Surface Mounted Electric Strike

The Lockwood Padde Series ES150 is a Surface Mounted Electric Strike suitable for use with rim or surface type dead latches. This Strike is easy to install and can be simply controlled by a keypad, keyswitch or integrated into any access control system.

ES150 offers high levels of security and features usually provided by more expensive electric locking solutions. The Electric Strike can be easily installed on steel and wooden door frames. A weather resistant version is also available for exterior applications.

Key Features

- Configure to Fail Safe or Fail Secure
- Easy installation suitable for steel and wooden door frames
- Stainless steel striker for extra strength and durability
- Available in 12/24Vdc
- Solenoid rated for continuous use
- IP56 weather resistant version available
- 5 Year Tricare Warranty (Padde Series)

Applications

- Surface or rim mounted applications
- Suitable for use with all access control systems
- Exposed areas

ES150 Series Surface Mounted Electric Strike

Ensure 1mm Working Gap without Mechanical Interference

Ordering Information

Part Number	Product Description
ES150	12/24Vdc Fail Safe Non-Monitored

Note: Change from Fail Safe (PTL) to Fail Secure (PTO) as required

Specification Statement

The Electric Strike must be suitable for surface mounted applications for use with rim or surface mounted door locks.

Where Power To Lock and Power To Open functions may be required in the same building, an individual strike is interchangeable from either "Power to Lock" or "Power to Open" on site.

The Electric Strike should not consume current greater than 243mA @ 12Vdc or 187mA @ 24Vdc. Certifications must include RCM.

The Strike should be tested to 1 million operations and have a minimum holding force not less than 680kg.

ES200 Non Monitored Series Electric Strike

The Lockwood Padde Series ES200 Series Electric Strikes are high security products manufactured from Stainless Steel and designed for use with all access control systems. The Strikes are suitable for use with hinged doors which require either fire or security control as part of a building management system.

These Strikes are flexible and can be changed from Fail Safe to Fail Secure, mounted on the left or right hand side of the door and are available in 12 or 24Vdc.

They offer a strong, dependable and long lasting Electric Strike solution.

Key Features

- Fail safe/fail secure changeable on site
- High security
- 4 Hour fire rating
- 850kg holding force
- 1 million cycles endurance rating
- Cast stainless steel body
- Stainless steel locking pins
- Low Current consumption - Max 175mA @ 12Vdc
- Mounting kit supplied as standard
- 5 Year Tricare Warranty (Padde Series)

Applications

- High traffic areas
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems

Product Details

Specification Statement

The Strike should be constructed of Stainless Steel, have a minimum holding force of 850kg and have an endurance rating of 1 million cycles. The strike must be changeable from Fail Safe to Fail Secure on site where required. The Strike should not consume current greater than 175mA at 12Vdc and have a solenoid rated for continuous use. Certifications must include RCM and 4 hr fire rating.

ES2000 Series Monitored Electric Strike

The Lockwood Padde Series ES2000 Series Electric Strikes are fully monitored high security products manufactured from Stainless Steel and designed for use with all access control systems. The Strikes are suitable for use with hinged doors which require either fire or security control as part of a building management system.

These Strikes are flexible and can be changed from Fail Safe to Fail Secure, mounted on the left or right hand side of the door and are available in 12Vdc.

They offer a strong, dependable and long-lasting Electric Strike solution with a 850kg holding force and endurance rating of 1 million cycles.

Key Features

- Fully monitored – strike locked and door latched
- Fail safe/fail secure changeable on site
- High security
- 4 Hour fire rating
- 850kg holding force
- 1 million cycles endurance rating
- Cast stainless steel body
- Stainless steel locking pins
- SCEC Endorsed
- Low Current consumption - Max 175ma @12Vdc
- Solenoid rated for continuous use
- Mounting kit supplied as standard
- 5 Year Tricare Warranty (Padde Series)

Applications

- High traffic areas
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems

Note: If Extension Lips are required, use ES2100 Electric Strike (Page 13)

Specification Statement

The Strike should be constructed of Stainless Steel, have a minimum holding force of 850kg and have an endurance rating of 1 million cycles. Monitoring must include independent door / latch & solenoid monitoring. The one strike must be changeable from Fail Safe to Fail Secure on site where required. The strike should not consume current greater than 175mA at 12Vdc and have a solenoid rated for continuous use. Certifications must include CE, C-Tick and 4 hr fire rating.

ES2100 Series Monitored Electric Strike

The Lockwood Padde Series ES2100 is the latest product to join the iconic Lockwood range of Electric Strikes. Tested in accordance with Australian Standards this Strike offers superior strength, and is durability tested to 1.5 million operations.

Standard features include variable voltage, patented field selectable Fail Safe/Fail Secure mode change and a unique integrated door position switch.

Integrated Door Position Switch

The ES2100 now offers a unique new monitoring feature not available in other Strikes on the market today. The Strike has an integrated reed switch that when combined with a specialised Lockwood Mortice Lock, provides door position monitoring. The Strike is supplied with a standard door magnet for use with cylindrical latches. Lockwood Mortice Locks and Faceplate accessories are sold separately.

Key Features

- Patented field selectable Fail Safe/Fail Secure
- Multi voltage 10–30Vdc
- Fully monitored:
 - Integrated door position (reed) switch
 - Solenoid/Locked
 - Latch position
- 1000kg holding force
- 4hr fire rating
- Mounting tabs as supplied standard
- 5 Year Tricare Warranty (Padde Series)
- Weather Resistant (IP54)
- Built-in Protection Diode

Applications

- High traffic areas
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems
- Doors requiring additional door position monitoring

Product Details

Voltage	Variable 10–30Vdc
Current	200mA @ 12Vdc - 120mA @ 24Vdc
Solenoids	Rated for continuous use
Monitoring	Latch Strike locked Door position (reed switch)
Holding Force	1000kg static strength rating
Endurance	Cycle tested to 1.5 million operations
Latch	Suitable for 15mm latch bolt with 3mm door gap
Environment	Operational temperature range -20°C to +60°C
Body and Keeper	Stainless Steel

Standards and Compliance

SL8	(Security) Australian Lock Standard (AS4145.2.2008)

ES2600 Series Panic Bar Monitored Electric Strike

The Lockwood Padde Series ES2600 Series Surface Mounted Electric Strikes are high security products manufactured from Stainless Steel and designed to be used with existing and new Panic Bars fitted to emergency doors.

When used in conjunction with a standard access control system, these Strikes convert “Exit only” doors with “Pullman type” latches into a full access controlled door, thereby allowing authorised access from the secure side.

The ES2600 series are fully monitored with both solenoid and latch/door monitoring functions and can be changed from Fail Safe to Fail Secure on site.

Key Features

- Fail Safe/Fail Secure changeable on site
- High security
- Available in 12 or 24Vdc
- 650kg holding force
- 1 million cycles endurance rating
- Body depth only 27mm
- Cast stainless steel body
- Low current consumption - max 175mA @ 12Vdc
- Continuously rated solenoid
- Installation template
- 5 Year Tricare Warranty (Padde Series)

Applications

- For use with Panic Bars
- Surface mount
- Egress doors
- Fire rated door sets
- Open out door sets
- Suitable for use with all access control systems

Product Details

Voltage	12 or 24Vdc
Current	175mA @ 12Vdc - 88mA @ 24Vdc
Solenoids	Solenoids rated for continuous use.
Monitoring	Solenoid Monitor - 1 amp NO/NC microswitch Door / Latch Monitor - 1 amp NO/NC microswitch
Holding Force	650kg Static Strength Rating
Endurance	Cycle tested to 1,000,000 operations
Additional	Anti friction roller (patented) Suits panic bars with 15 to 20mm Pullman latch projection
Environment	Operational temperature range -20°C to +60°C
Body	Solid Stainless Steel Construction
Keeper	Stainless Steel
Latch	Suitable for 15-20mm pullman latch

Standards and Compliance

Specification Statement

The Strike should be constructed of Stainless Steel, have a minimum holding force of 650kg and have an endurance rating of 1 million cycles. Maximum penetration into the door frame should not exceed 12mm. The one strike must be changeable from Fail Safe to Fail Secure onsite where required. The Strike should not consume current greater than 175mA at 12Vdc and have a solenoid rated for continuous use. Certifications must include RCM.

ES3200 Series Monitored Electric Strike

The Lockwood Padde Series ES3200 Series Electric Strikes are designed for high security applications and manufactured from solid Stainless Steel.

These long ANSI Strikes offer a strong dependable and long-lasting Electric Strike solution and are suitable for use with any access control system.

These Strikes are extremely flexible and can be changed from Fail Safe to Fail Secure and mounted on the left or right hand side of the door, thus reducing the amount of variants needed to cover each application.

Key Features

- Fail Safe/Fail Secure changeable on site
- Available in 12Vdc
- 850kg holding force
- 1 million cycles endurance rating
- Stainless Steel locking pins
- Continuously rated solenoid
- 5 Year Tricare Warranty (Padde Series)

Applications

- Timber or metal doors
- Open in/open out doors
- Suitable for use with all access control systems

ES3200-1	ES3200 E/Strike 12Vdc Fail Safe Non Monitored

Specification Statement

The Strike should be constructed of Stainless Steel, have a minimum holding force of 850kg and have an endurance rating of 1 million cycles. Monitoring must include independent door / latch & solenoid monitoring. The one strike must be changeable from Fail Safe to Fail Secure onsite where required. The Strike should not consume current greater than 175mA @ 12Vdc and have a solenoid rated for continuous use. Certifications must include RCM.

ES9000 Series Pre-Load Strike

The Lockwood Padde Series ES9000 has been designed to suit the harshest commercial environments, and has the unique feature of the ability to operate with up to 25kg of pre-load pressure on the keeper. Pre-load is a common condition that is caused by pulling on a door before it unlocks, the weight of warped or drooping doors, seals on fire doors or by differential air pressure created when heating and cooling systems are in use.

Standard features include multi voltage 10 - 30Vdc and field changeable settings from Fail Safe to Fail Secure.

Built to last, this is a premium locking solution that has been tested in excess of 2 million cycles and boasts unique features like no other available on the market today.

Key Features

- Operates under pre-load up to 25kg
- Easy field selectable fail safe/fail secure
- Multi voltage 10-30Vdc
- 1300kg holding force
- 2.5 million cycles endurance rating
- Latch keeper is significantly quieter in operation
- Weather resistant
- Mounting tabs as standard
- Non handed
- 5 Year Tricare Warranty (Padde Series)
- Weather Resistant (IP54)
- Built in Protection Diode

Applications

- High traffic areas
- Doors subjected to side load (pre load)
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems

Product Details

220200-519	Mounting Kit

Note: All ES9000 Series Electric Strikes are supplied in Fail Safe configuration.

Specification Statement

The Electric Strike should be fully monitored and have independent door / latch and solenoid monitor switches. Holding force for the Strike should be not less than 1300kg.

Where Power to Lock and Power to Open functions may be required in the same building, a single Electric Strike should be interchangeable from either Fail Safe or Fail Secure from the rear of the Strike.

The Electric Strike should not consume current greater than 250mA @ 12Vdc and have a solenoid rated for continuous use. A fire rating not less than 4 hours is required where applicable. The Strike must be capable of operating with up to 25kg of pre-load pressure applied to the keeper, be tested to 2.5 million operations and carry a minimum warranty of 5 years.

ES9100 Series Pre-Load Strike with Door Position Monitoring

Following on from the extremely popular and industry leading Lockwood/Trimec ES9000 Pre-Load Electric Strike, the Lockwood ES9100 Electric Strike provides all the key features and specifications of the ES9000 but with the added inclusion of Door Position Monitoring (DPS) via an integrated Reed Switch. The ES9100 body is also pre-drilled for the inclusion of 25mm, 50mm or 75mm Extension Lips, if required.

The Lockwood Padde Series ES9100 has been designed to suit the harshest commercial environments, and has the unique feature of the ability to operate with up to 25kg of pre-load pressure on the keeper. Pre-load is a common condition that is caused by pulling on a door before it unlocks, the weight of warped or drooping doors, seals on fire doors or by differential air pressure created when heating and cooling systems are in use. Standard features include multi voltage 10 - 30VDC and field changeable settings from fail safe to fail secure. Built to last, this is a premium locking solution that has been tested in excess of 2 million cycles and boasts unique features like no other available on the market today.

Key Features

- Operates under pre load up to 25kg
- Door Position Monitoring Output
- Lock Status and Latch Position Monitoring Output
- Easy field selectable fail safe/fail secure
- Multi voltage 10-30VDC
- 1300kg holding force
- 2.5 million cycles endurance rating
- Latch keeper is significantly quieter in operation
- Weather resistant (IP54)
- Pre-Drilled for Extension Lips
- Mounting tabs included
- Non handed
- 5 Year Tricare Warranty (Padde Series)
- Built in Protection Diode

Applications

- High traffic areas
- Doors subjected to side load (pre load)
- Fire rated door sets
- Inward and Outward opening doors
- Suitable for use with all access control systems

Product Details

Voltage:	10 to 30VDC
Current:	250mA @ 12VDC, 130mA @ 24VDC
Monitoring:	Solenoid (1 Amp NO/NC), Door/Latch (1 Amp NO/NC) Door Position (1 Amp NC)
Holding Force:	1300kg Static Strength Rating
Endurance:	1,200,000 cycles @ 25kg Pre-Load, 2,500,000 cycles without Pre-Load
Latching:	Suitable for use with 15mm Latch and 3mm Door Gap
Environment:	Operating Temperature range -20C to +60C, IP54 Rating
Body:	Solid Stainless Steel Construction
Keeper:	Stainless Steel

Z4 and Z8 Single Series Monitored

The Lockwood Padde Series Single Series Monitored Electromagnetic Locks, operate with holding forces from 200kg up to 450kg. These can also be used for doors that need to be monitored in terms of door position and if the door is locked.

Covering a range of applications the Z4 and Z8 Electromagnets are ideal for applications from cupboard doors through to high use commercial swing doors.

With fixing options including wood, aluminium and steel constructions, as well as glass door applications, the range caters to most electromagnetic needs.

Key Features

- Fail-safe: unlocks when power is removed
- Easy installation: suitable for both new and retrofit usage
- High holding force: refer to the technical data overleaf
- Self-alignment: armature plate pivots to accommodate door drop
- Silent operation: no humming or buzzing

- Dual voltage: site selectable 12 or 24 Vdc
- Monitoring: reed switch monitoring on all models, hall-effect monitoring on Z4 and Z8 models
- Instantaneous release: smart electronics on the Z Series Electromagnets eliminate residual magnetism
- 5 Year Tricare Warranty (Padde Series)

Monitoring

Hall / Bond Monitoring

This indicates that the lock is powered and that the armature plate is in position and magnetically bonded (it monitors if the magnet is locked)

Reed Switch Monitoring

An integrated reed switch monitors the door position separately (it monitors the position of the door)

Applications

- Aluminium doors
- Glass doors
- IT storage rooms
- Access control
- Surface mount for inswing and outswing doors

Specification Statement

The Single Series Electromagnetic Lock should be constructed in an aluminium case with heavy duty electromagnet. The range only operates in Fail Safe mode and relies on a secondary lock or battery backup system. In some cases the magnet armature plate pivots to accommodate door drop. The lock needs to be equipped with "smart electronics" that have zero residual magnetism (instantaneous release). This is crucial for correct operation.

Z4 and Z8 Double Series Monitored

Lockwood Padde Series Double Series Monitored Electromagnetic Locks, operate with holding forces from 400kg to 900kg.

These can also be used for doors that need to be monitored in terms of door position and if the door is locked.

Covering a range of applications the Z4 and Z8 Electromagnets are ideal for applications from cupboard doors through to high use commercial swing doors.

With fixing options including wood, aluminium and steel constructions, as well as glass door applications, the range caters to most electromagnetic needs.

Key Features

- Fail-safe: unlocks when power is removed
- Easy installation: suitable for both new and retrofit usage
- High holding force: refer to the technical data overleaf
- Self-alignment: armature plate pivots to accommodate door drop

- Silent operation: no humming or buzzing
- Dual voltage: site selectable 12 or 24 Vdc
- Monitoring: hall-effect and reed switch monitoring on all models
- Instantaneous release: smart electronics on the Z Series Electromagnets eliminate residual magnetism
- 5 Year Tricare Warranty (Padde Series)

Applications

- Aluminium doors
- Double swing doors
- Access control
- Surface mount for inswing and outswing doors

Monitoring

Hall / Bond Monitoring

This indicates that the lock is powered and that the armature plate is in position and magnetically bonded (it monitors if the magnet is locked)

Reed Switch Monitoring

An integrated reed switch monitors the door position separately (it monitors the position of the door)

Specification Statement

The Double Series Electromagnetic Lock should be constructed in an aluminium base with heavy duty electromagnet. The range only operates in Fail Safe mode and relies on a secondary lock or battery backup system. The lock needs to be equipped with "smart electronics" that have zero residual magnetism (instantaneous release). This is crucial for correct operation.

Z4 Recessed Electromagnetic Lock

The Lockwood Padde Series Z4 Recessed Electromagnetic Locks operate with holding forces up to 150kg. Covering a range of applications these magnets are ideal for situations where the magnet needs to be recessed such as swing and sliding doors. With fixing options including wood, aluminium and steel constructions, the range caters to most needs. The electromagnets are available in both monitored and non monitored models, using hall-effect monitoring on some. These electromagnetic locks are CSIRO approved for use on fire doors and are characterised by their high quality and proven reliability in both fire and security applications.

Key Features

- Fail-safe: unlocks when power is removed
- Easy installation: suitable for both new and retrofit usage
- High holding force: refer to the technical data overleaf
- Self-alignment: armature plate pivots to accommodate door drop
- Silent operation: no humming or buzzing
- Dual voltage: site selectable 12 or 24 Vdc
- Monitored versions: hall-effect status monitoring available on some models
- Instantaneous release: smart electronics on the Z4 Recessed Electromagnetic Lock eliminate residual magnetism

- 5 Year Tricare Warranty (Padde Series)

Applications

- Various sliding door applications

Z4 Recessed Electromagnetic Lock

Z4 Recessed Electromagnetic Lock

Ordering Information

Part Number	Product Description
EMZ4-RSN	EMZ4 E/Magnet Recessed 12/24Vdc Single Non Monitored
EMZ4-RSM	EMZ4 E/Magnet Recessed 12/24Vdc Single Monitored

Specification Statement

The Z4 Recessed Electromagnetic Lock should be constructed in an aluminium case with heavy duty electromagnet. The range only operates in Fail Safe mode and relies on a secondary lock or battery backup system. The lock needs to be equipped with "smart electronics" that have zero residual magnetism (instantaneous release). This is crucial for correct operation.

Weather Resistant Electromagnetic Lock

The Lockwood Padde Series Weather Resistant Electromagnetic Lock operates with Nominal Holding Force of 430kg *. Covering a range of applications these are ideal where magnets are exposed to the weather. With fixing options including wood, aluminium and steel constructions as well as glass door applications, the range caters to most external needs. The electromagnets are available in monitored models using hall-effect monitoring. These electromagnetic locks are CSIRO approved for use on fire doors and are characterised by their high quality and proven reliability in both fire and security applications. The “smart electronics” have zero residual magnetism meaning instantaneous release when required. An additional advantage is the ability to select either 12V or 24V DC application on site.

Key Features

- Fail-safe: unlocks when power is removed
- Easy installation: suitable for both new and retrofit usage
- Self-alignment: armature plate pivots to accommodate door drop
- Silent operation: no humming or buzzing
- Dual voltage: site selectable 12 or 24 Vdc
- Monitored versions: hall-effect status monitoring available
- 5 Year Tricare Warranty (Padde Series)

Monitoring

Hall / Bond Monitoring

Hall-effect position sensors are non-contact devices that convert energy from a magnetic field into an electrical signal. This indicates that the lock is powered and that the armature plate is in position and magnetically bonded (it monitors if the magnet is locked).

Applications

- Outdoor / exposed doors
- Doors located in coastal areas

Electromagnetic Lock Accessories

L and Z Brackets

Angle Bracket

Armature Plate

Glass Door "U" Bracket

The Lockwood Padde Series Electromagnetic Lock range offers a number of accessory options. These accessories allow the Electromagnetic Locks to be used in a number of different applications and can be adjusted and suited to each situation. This allows the installer to configure the door as required allowing user specific features such as open in / open out selection or glass door applications. Lockwood's Electromagnetic Lock Accessories meet or exceed local and international standards, providing safe and secure locking.

Key Features

- Adjustable fixing positions
- Cast aluminium construction
- Meet and exceed international and local standards

Applications

- Open in/open out doors
- Glass door security
- Double doors security
- Sliding door security

Wall and Floor Mounted Hold Open Magnets

The Lockwood Padde Series EM830 Series of Hold Open Magnets can work as standalone or with an integrated fire system. These Fail-Safe devices will automatically release if connected to a fire detection system.

Some models include integrated "interrupter buttons" giving the ability to open or close the door manually at any time. Other models have an integrated soft close shock absorbers for silent operation i.e. in Hospitals

Key Features

- Fail Safe Operation – Unlocks when power is removed
- Shock absorber for soft close (model dependent)
- Integrated Interrupter push-button (model dependent)
- Modern Design
- Silent Operation (no humming)
- Easy Install
- Space bracket for wall mount option standard
- 5 Year Tricare Warranty (Padde Series)

Applications

Fire Doors that need to close upon fire signal

- Fire Doors
- Doors that restrict the passage of fire

Non Fire Doors that need to be held open

- Cinema Doors
- Hospital Doors
- Parameter Doors
- Other Doors

Hold open devices are primarily used for fire doors, but not only limited to this application. Other known applications are doors that require to be held open for several hours i.e. with Cabin Hooks. For this application the device needs constant power and no "smarts" are required.

Note: Ensure you select the model with Integrated Interrupter push-button and also buy 24vdc Power supply

TB25 Drop Bolt

The Lockwood Padde Series TB25 range of Drop Bolts represent true engineering innovation, design excellence and the superior quality customers have come to expect and demand from Lockwood. Designed for use on swing-through, double action doors and ideal for applications where an Electric Strike is impractical.

Features

- High Security: bolt is deadlocked in the extended position
- Bolt position monitored
- Door position monitor with integrated magnet in the strike plate (no need to install a separate reed switch)
- Multiple orientation, drop bolts will work horizontally or vertically
- Power to Lock/Power to Open
- Continuously rated solenoid
- Tamper proof: lock cannot be defeated by slipping a metal object between lock and striker plate
- Intelligent electronics: these intelligent bolts will attempt to re-close the bolt 8 times, allowing time for swing through doors to settle in the closed position
- Thermal protection: in the event of solenoid overheat, a thermal fuse will operate eliminating any fire risk
- 5 Year Tricare Warranty (Padde Series)

Applications

- Misaligned doors
- Timer doors

Product Details

228250-000	EB25 SS Short Strike Plate RH
228250-002	EB25 SS Long Strike Plate RH
228250-003	EB25 SS Housing

Specification Statement

The bolt must be able to operate in horizontal and vertical orientations. The position of the bolt must be monitored as well as have an integrated reed switch for door position monitoring. The electronic functions must include: 8 x lock and unlock attempts, 8 second unlock delay, automatic relock after 8 seconds, power reduction circuitry to limit the holding current and a one time thermal fuse cut-out in case of solenoid overheating. The face plate and strike plate must be finished in Stainless Steel.

TB25KO Drop Bolt

The Lockwood Padde Series TB25KO range of Drop Bolts represent true engineering innovation, design excellence and the superior quality customers have come to expect and demand from Lockwood. Designed for use on swing-through double action doors and are ideal for applications where an Electric Strike is impractical. The TB25KO offer a unique mechanical override with an integrated Euro Profile Cylinder.

Features

- High security: bolt is deadlocked in the extended position
- Mechanical key override in the event of power failure (Euro Profile Cylinder)
- Bolt position monitored
- Door position monitor with integrated magnet in the Strike Plate (no need to install a separate reed switch)
- Multiple orientation: drop bolts will work horizontally or vertically
- Power to Lock/Power to Open
- Continuously rated solenoid
- Tamper proof: lock cannot be defeated by slipping a metal object between lock and striker plate
- Thermal protection: in the event of solenoid overheat, a thermal fuse will operate eliminating any fire risk
- 5 Year Tricare Warranty (Padde Series)

Applications

- Misaligned doors
- Timer doors

Product Details

Voltage	12 or 24Vdc
Current (Start)	1100mA @ 12V, 1000mA @ 24V
Current (Holding)	210mA @ 12V, 90mA @ 24V
Holding Force	1000kg
Locking Mode	Fail safe or Fail Secure (non field selectable)
Dimensions (Mortice)	228 x 22 mm
Bolt Length	12.7 x 16 mm
Face Plate Size	280 x 25 mm
Monitoring Contacts	Bolt, door and key

Standards and Compliance

 CE Approved

 RCM Certified

TB25KO Drop Bolt

Ordering Information

Part Number	Product Description
TB25KO-1	TB25 K/O D/Bolt 12-24Vdc Fail Safe Monitored
TB25KO-2	TB25 K/O D/Bolt 12-24Vdc Fail Secure Monitored

Specification Statement

The bolt must be able to operate in horizontal and vertical orientations. The position of the bolt must be monitored as well as have an integrated reed switch for door position monitoring. The electronic functions must include: 8 x lock and unlock attempts, 8 second unlock delay, automatic relock after 8 seconds, power reduction circuitry to limit the holding current and a one time thermal fuse cut-out in case of solenoid overheating. The face plate and strike plate must be finished in Stainless Steel.

ES6000® Hook Lock

Lockwood Padde Series ES6000 Hook Lock is suitable for swinging doors, sliding doors and is easily attached to wood or steel door frames. ES6000 is heavy duty designed with its high pre-load (side load) capability of up to 300 kg, high holding force of up to 700 kg and up to 4hr fire rating. Both Power to Open and Power to Lock models are available.

The ES6000 is available in both recess and surface mounted versions.

The ES6000 recess mounted version is completed with an elegant Satin Stainless Steel Faceplate. The surface mounted version is completed with a cast aluminium cover that can be supplied in a variety of colours to match existing door frames.

ES6000 can be mounted vertically and horizontally, with self-latching ability without power for fire applications.

Features

- Power to Open or Power to Lock versions available
- Side load (pre-load) capable: operates freely with up to 300 kg of side pressure
- Self latching: will self latch without power for fire applications

- 680 kg holding force
- Robust construction: stainless steel components used
- Low profile: will protrude only 40 mm into door headroom
- Multi voltage: automatic selection 12 to 30Vdc with back EMF protection and reverse polarity protection
- Multi orientation: can be mounted vertically or horizontally
- Low current consumption
12VDC-250mA after 1 sec. (initial current 830mA)
24VDC-140mA after 1 sec. (initial current 530mA)
- Monitored: locked and unlocked
- 300 kg pre-load capability
- 5 Year Tricare Warranty (Padde Series)

Applications

- Heavy duty applications
- Sliding and swing door applications
- High air pressure environments (high pre-load rating)

Product Details

Voltage	Supply Voltage 12-30Vdc Ground (OV)
Current	12Vdc-250 mA after 1 sec. (initial current 830mA) 24Vdc-140 mA after 1 sec. (initial current 530mA)
Monitoring	Door Locked (Solenoid) - Door Closed (Latch)
Strength	1500 lbs. (680 kg) static strength rating 70 foot-lbs. dynamic strength rating
Endurance	250,000 cycles endurance testing Internal testing achieved: 500,000 cycles of operation
Pre-Load	660lbs (300kg) pre-load capability
Environment	Operational temperature range: -20°C to +60°C
Lock Body	Cast Aluminium Construction
Lock Bolt	Solid Stainless Steel

Standards and Compliance

Successfully fire rated up to 2 hours on fire door assemblies in accordance with AS1905.1. 2005 (Part 1: Fire resistant door sets)

Approved to UL1034 (highest level)

RCM Certified

ES6000 Hook Lock

Ordering Information

Part Number	Product Description
ES6000M-1	ES6000 Hook Lock Mortice 12/24Vdc Fail Safe Monitored
ES6000S-1	ES6000 Hook Lock Surface 12/24Vdc Fail Safe Monitored
ES6000M-2	ES6000 Hook Lock Mortice 12/24Vdc Fail Secure Monitored
ES6000S-2	ES6000 Hook Lock Surface 12/24Vdc Fail Secure Monitored
Accessories	
206000-010	Spare Cover for Hook Lock, Silver

Specification Statement

This lock must be able to operate with up to 300 kg of preload pressure, with a holding force of 700 kg. The lock must be multi voltage selection 12 - 30 Volts with back EMF protection for reverse polarity. Lock can be mounted both horizontally or vertically. The lock needs to be subjected to vigorous testing and achieve a minimum of 500,000 cycles.

Lockwood Padde Series ES8200 Technilock is a high security locking solution with comprehensive resistance against all types of attack and manipulation. Originally designed and developed for custodial purposes, the Technilock is in use today in government institutions, banks, embassies and jewellers.

ES8200 is available in 30mm and 60mm backset, in both Power to Lock or Power to Open configuration. Key override monitoring version is also available.

Features

- Side load (pre-load) capable – bolt will release with up to 70kg of side pressure – ideal for use on doors with seals or doors that are subjected to high wind load or air-conditioning pressures
- Extreme holding force – will withstand more than 2500kgs, the test rig manufactured to test the bolt broke at 2500kg; the bolt will withstand more than this

- Power to Lock and Power to Open (must be specified) versions available on request. The bolt is not interchangeable in the field and configuration must be specified when ordering
- High speed operation – locks in less than 1 second
- Multiple orientations – can be mounted horizontally or vertically
- Comprehensive monitoring – bolt locked, door closed, optional key-override monitoring
- 5 Year Tricare Warranty (Padde Series)

Applications

- High security locking
- Government applications
- Custodial applications
- Banking and security applications

Product Details

Voltage	3 wire control - 24Vdc regulated supply only
Current	Start current 4.5 Amp (24Vdc) for ½ second Holding current 500mA (24Vdc)
Monitoring	Bolt position 25mA (30Vdc) NC - Door position 25mA (30Vdc) NC
Holding Force	In excess of 2500kg holding force
Pre Load	Will open with 70kg of side pressure (pre-load)
Bolt Throw	Dead Bolt throw of 20mm
Door Clearance	Maximum door gap = 5.5mm
Environment	Operational temperature range: -20°C to + 80°C
Lock Body	Solid Stainless Steel Construction
Lock Bolt	Solid Stainless Steel

Standards and Compliance

3570 Series Electric Mortice Lock

Designed and manufactured in Australia, the 3570 Series Electric Mortice Lock is a high performance lock of superior quality. It is constructed from high grade zinc alloy, with a stainless steel latch bolt and faceplate and is suited for all commercial applications.

The lock can be operated by push buttons, intercom systems and key switches; or integrated with electronic access control systems for use with higher security devices such as keypads or card readers.

Standards and Compliance

Product Details

Voltage	12Vdc - 24Vdc Operating Voltage
Current	500mA (max) 80mA holding @ 12Vdc 275mA (max) 50mA holding @ 24Vdc
LED Current	When LED's are fitted, add 15mA (max) to total current draw
Monitoring	Dual Key override Deadlatched Locked Door closed Request to exit Microswitches: 500mA (max) @ 30Vdc each circuit. Reedswitch: 100mA (max) @ 30Vdc
Environment	Operational temperature range -20c to +60c
Case/Cover	High purity Zinc alloy construction
Backset	60mm standard, 89 & 127 mm available
Latch Bolts	Reversible with Stainless Steel construction
Door Clearance	3 - 6.5 mm
Door Thickness	Standard applications 32 to 50mm
Cylinder	Standard Lockwood oval shaped cylinders
Cabling	1.6 metre length of cable with 12 pin socket supplied with each lock. Recommended cable: 18AWG (0.82mm ²) cable runs up to 30m
Furniture	Compatible with Lockwood series door furniture
Standard Finishes	Satin Chrome (SC) standard

3570 Series Electric Mortice Lock

Key Features

Designed with flexibility in mind, the one lock can cover all functions and is easily configured on site for the required application.

Available in non monitored and monitored versions.

Monitoring Features:

- Dead latched and Locked
- Door position/Reed switch
- Dual key override monitoring
- Request to exit/REX
- LED indication

Field Changeable Settings:

- Fail Safe/Fail Secure configuration.
- Multi-voltage - will work on 12-24 Vdc systems.
- Handing - left hand and right hand doors
- Selection of free lever or locked lever on both sides of the door
- Key override monitoring either side of the door
- Monitoring contacts – normally closed, normally open (for key override and request to exit only)

3570 Series Electric Mortice Lock

Dimension	Backset		
A	60	89	127
B	100	129	167

Specification Statement

The lock should be capable of operation on voltages between 12 – 24Vdc and have a current consumption not more than 80mA (holding) @12Vdc and 50mA (holding) @24Vdc. Monitored locks must be capable of monitoring the following functions: Key override, door position / reed switch, selectable hub / Request to exit and locking bar status. All monitoring outputs must have the ability to be wired independently. All settings – including: fail safe / fail secure, handing, hub selection must be field configurable.

3570 Series Electric Mortice Lock

Ordering Procedure

Sample part number 3572ELAM2RSC is made up of several sections. Choose your product by selecting an option from each section.

Backset	Series	Lock Functions	Electric Lock	Safety Function	Sub Function	Handing	Finish
3	5	72	EL	A	M2	R	SC

Backset	Lock Function	Safety Function	Handing
60 mm	Primary Lock	Fail Safe (Power to lock)	Right Handed
89 mm	Vestibule Lock	Fail Secure (Power to unlock)	Left Handed
127 mm	Combination Lock		

Series	Electric Lock	Sub Function	Finish
Synergy	Electric Lock	Non-monitored Lock (0 Cylinders)	Satin Chrome
		Non-monitored Lock (1 Cylinders)	
		Non-monitored Lock (1 Cylinder)	
		Non-monitored Lock (2 Cylinders)	
		Fully monitored Lock including KOM (0 Cylinders)	
		Fully monitored Lock including KOM (1 Cylinder)	
		Fully monitored Lock including KOM (2 Cylinders)	

Ordering Notes

- 3570 primary locks can be set to achieve all lock functions post purchase, and should be the preferred option when ordering.
- Customised locks are available upon request and incur an additional surcharge and 10 day lead time.
- See over page for primary lock part numbers.

Handing Chart

3579 Series Electric Mortice Lock

Designed and manufactured in Australia, the 3579 Series Electric Mortice is a high performance lock of superior quality. It is constructed from high grade zinc alloy secured between stainless plates making suitable for high security applications.

The 3579 lock can be operated by push buttons, intercom systems and key switches; or integrated with electronic access control systems for use with higher security devices such as keypads or card readers.

3579 Series Electric Mortice Lock

Key Features

Designed with flexibility in mind, the one lock can cover all functions and is easily configured on site for the required application.

- Stainless Steel Latch and Faceplate
- Stainless Steel Plates that encapsulate the body against attempted vandalism
- Available in Monitored versions only

Monitoring Features

- Dead latched and Locked
- Door position/Reed switch
- Dual key override monitoring
- Request to exit/REX
- LED indication

Field Changeable Settings

- Fail safe/fail secure configuration.
- Multi-voltage - will work on 12-24 Vdc systems.
- Handing - left hand and right hand doors
- Selection of free lever or locked lever on both sides of the door
- Key override monitoring either side of the door
- Monitoring contacts – normally closed, normally open (for key override and request to exit only)

3579 Series Electric Mortice Lock Ordering Procedure

Part Number	Product Description
3579ELM0SC	Electric Mortice Lock 3579 Primary Lock 60mm Monitored
4579ELM0SC	Electric Mortice Lock 4579 Primary Lock 89mm Monitored
5579ELM0SC	Electric Mortice Lock 5579 Primary Lock 127mm Monitored

Specification Statement

The lock body should be encapsulated with Stainless Steel. The lock should be capable of operation on voltages between 12 – 24Vdc and have a current consumption not more than 80mA (holding) @12Vdc and 50mA (holding) @24Vdc. Monitored locks must be capable of monitoring the following functions: Key override, door position / reed switch, selectable hub / Request to exit and locking bar status. All monitoring outputs must have the ability to be wired independently. All settings – including: fail safe / fail secure, handing, hub selection must be field configurable.

3579HS Series Electric Mortice Lock

Designed and manufactured in Australia, the 3579HS Series Electric Mortice is designed for unique applications where Fail Secure functionality is required externally with Fail Safe functionality on the inside. To achieve this function the lock must be used in conjunction with an electric strike.

The 3579HS is constructed from the same material as the 3579 counterpart.

3579HS Series Electric Mortice Lock

Key Features

Designed with flexibility in mind, the one lock can cover all functions and is easily configured on site for the required application.

- Stainless Steel Latch and Faceplate
- Stainless Steel Plates that encapsulate the body against attempted vandalism
- Available in Monitored versions only

Monitoring Features

- Dead latched and Locked
- Door position/Reed switch
- Dual key override monitoring
- Request to exit/REX
- LED indication

Field Changeable Settings

- Fail safe/fail secure configuration.
- Multi-voltage - will work on 12-24 Vdc systems.
- Handing - left hand and right hand doors
- Selection of free lever or locked lever on both sides of the door
- Key override monitoring either side of the door
- Monitoring contacts – normally closed, normally closed

Note: This lock is designed to operate in conjunction with an electric strike. The lock will never unlock electrically from the external side.

Lock Functions

The 3579HS Series Lock is designed to provide internal emergency egress on doors whereby the door remains secure on the outside in the event of a fire alarm or break glass event.

A typical door set up would include the following hardware:

- Proximity readers on both sides of the door to gain access either way
- 3579HS Electric Mortice Lock set to Fail Safe inside. Note the lock remains in the locked state (externally) 100% of the time if power is applied or not.
- Electric strike set to fail secure
- Break glass or Fire Panel connected to the mortice lock only

To enter or exit the door the user would swipe a proximity card to the reader. Upon authorisation from the EAC panel the electric strike would unlock, allowing the user to open the door. The electric mortice lock does not change state.

In the event of an emergency (fire alarm or break glass activation), power is cut to the electric mortice lock & places it in a fail safe mode on the internal side only. The mortice lock remains in a Fail Secure state on the external side.

Note: The 3579HS Series Lock can never be electrically unlocked from the outside. A secondary locking device (electric strike) must be used in conjunction with this lock.

3579 Series Electric Mortice Lock Ordering Procedure

Part Number	Product Description
3579HSELM0SC	High Security Elec Mortice 3579HS Primary Lock 60 mm
4579HSELM0SC	High Security Elec Mortice 3579HS Primary Lock 89 mm
5579HSELM0SC	High Security Elec Mortice 3579HS Primary Lock 127 mm

Specification Statement

The lock body should be encapsulated with Stainless Steel. The lock should be capable of operation on voltages between 12 – 24Vdc and have a current consumption not more than 80mA (holding) @12Vdc and 50mA (holding) @24Vdc. Monitored locks must be capable of monitoring the following functions: Key override, door position / reed switch, selectable hub / Request to exit and locking bar status. All monitoring outputs must have the ability to be wired independently. All settings – including: fail safe / fail secure, handing, hub selection must be field configurable. The lock must be capable of operating in fail safe mode internally and fail secure mode externally when used in conjunction with an electric strike.

Hi-O Room Guard Locking System

The Room Guard Locking System is based on state of the art Hi-O technology platform developed by ASSA ABLOY.

Bringing a new dimension to electronic locking systems as we know them today, the Hi-O platform has enabled this unique product offering that is designed for ease of use and simplified installation.

The system provides electronic lock control of multiple doors for any room requiring privacy by the occupants. The most common applications are shared bathrooms in hospitals and conference rooms with dual entries. The intelligence is embedded in the locking devices themselves, resulting in a plug and play system without the need for a door controller to lock and unlock the door; therefore extremely easy to install and cost effective.

Key Features

- One touch privacy
- All components supplied in one neat kit
- Plug and Play connectivity
- No requirement for external door controller or EAC system
- Fast, accurate and cost effective installation

Applications

- Shared bathrooms
- Conference rooms
- Laboratories

Function

Locking the door

- Enter either door and close door
- Activate internal turn knob
- Both doors automatically lock - outside
- External handles indicate red (locked)

To unlock/exit

- Activate internal lever on either door
- Both doors automatically unlock
- External handles indicate green (unlocked)

Note: In the event of an emergency, the doors may be unlocked externally via emergency override switches if fitted.

Standards and Compliance

Successfully fire rated up to 4 hours on fire door assemblies in accordance with AS1905.1. 2005

Hi-O Room Guard Locking System

Two Door Installation Layout

Installation Overview

The Room Guard Locking System does not require an external door controller to lock or unlock the door. The Electric Mortice Locks are simply plugged together, connected to the emergency override switches and then plugged into the power supply.

Note: The use of emergency override switches may not be required. In that case, the power supply is connected directly to mortice locks.

Hi-O Room Guard Locking System

Accessories Ordering Information

Part Number	Product Description
3570HRGKIT	Room Guard Kit – 2 doors
1822/70SC	Exterior door furniture with LED
1920/70SC	Interior door furniture

Ordering Information

The Room Guard Kit contains all necessary components and power supply to install a two door system. The door furniture must be ordered separately.

1. Order Room Guard two door kit
2. Order door furniture for two doors

Additional Information

- For alternative door furniture options and finishes, refer to Lockwood Product Catalogue Section 3.70 – Plate Door Furniture
- Locks are designed to work in fail safe mode
- Locks are non handed and can be configured on site

Selector® 3782EL Short Backset Electric Mortice Locks

Designed and manufactured in Australia the Selector 3782EL is a high performance electric mortice lock for narrow stile hinged doors. Designed to meet the varying requirements of commercial applications, the lock is the ideal compliment to high security access control systems and a great locking product to use with intercoms, keypads and key switches due to the intuitive operation of a locked or unlocked handle. These locks comply with building regulations for single-action escape doors.

The 3782EL is a fully field configurable primary electric mortice lock providing significant benefit over previous models. The unique motor driven operation, high security monitoring capabilities and on board door status LEDs provides a significant advancement in the specification, distribution, installation and servicing of electric mortice locks.

Key Features

- Variable voltage from 9 – 28VDC
- Simple in field selection of power to lock or power to open

- Full range of monitoring including Request to Exit (REX), Deadlatch, Door position, Key Override Monitoring (KOM) and locked status
- On board door status LEDs improves installation and reliability
- Unique functions for reader in / reader out applications which allows external side to fail securely while internal side fails safe allowing free egress
- Motor driven providing lower power usage in power to lock applications
- 3 wire control means the power can be supplied independent to the locking control signal making the lock less susceptible to issues associated with voltage drop across long wiring runs

Standards and Compliance

S8 (Security) Australian Lock Standard (AS4145.2.2008) (when used with equivalent security level keying system)

D8 (Durability) Australian Lock Standard (AS4145.2.2008)

RCM Certified

Product Details

Voltage	9 – 28VDC
Current	300mA MAX (20mA continuous if LEDs are activated)
Monitoring	Key override (NC), Deadlatch (NC), Door Position (NC), REX (NO / NC) and Lock Status (NC) - all 30VDC 50mA MAX
Environment	Operational temperature range -15°C to +60°C
Case/Cover	High purity zinc alloy material cases with stainless steel chassis plates. Stainless steel faceplates provided as standard
Backset	23mm standard, 25.4, 30 and 38 mm extended available
Latch bolts	15mm stainless steel construction
Door Clearance	3 - 6.5 mm
Door thickness	Standard applications 32 to 50mm Extension kits available
Cylinder	Standard Lockwood oval shaped cylinders can provide mechanical key override. Key retracts bolt when used with either X7 cam or V cam. Locks are supplied with X7 cams included.
Cabling	Supplied with 3.6m cable with 12 pin connector and moisture deflecting boot supplied with each lock Recommended cabling: 18AWG (0.82mm ²) cable runs up to 30m
Furniture	Compatible with Lockwood 4800 and 5800 Series Brass Door Furniture . This includes function 11 (cylinder, lever and lens) and function 12 (lever and lens) which are specifically designed to work with this lock to allow the onboard LEDs to illuminate door status.
Finishes	Satin Stainless Steel (SS)

Y	40	42.4	47	55

Specification Statement

The lock should be capable of operation on voltages of 9-28VDC and have a current consumption not more than 300mA (max). Locks should have selectable on-board LEDs and must be capable of monitoring the following functions: key override, door position/reed switch, request to exit, and locking bar status. All monitoring outputs must have the ability to be wired independently. All settings - including power to lock/power to open, handing, hub selection must be field configurable.

Selector® 3782EL Short Backset Electric Mortice Locks

Door Status Indication

The 3782EL features on board LEDs greatly improving the installation process for door furniture where door status indication is required by eliminating the need to wire furniture to the lock. To support this new plate furniture configurations have been established with an integrated lens providing simple red/green door status illumination.

Lockwood 4800 and 5800 series furniture with lens is available in a wide array of levers and finish options. Refer Lockwood Plate Door Furniture catalogue for available options.

4800 Series Shown

Selector® 3782EL Short Backset Electric Mortice Locks

Accessories - Cables and Adaptors

Part Number Product Description

SP3782EL-251 3782EL SERIES 9 PIN ADAPTOR TO RETROFIT 3582EL

SP3782EL-252 3782EL SERIES CABLE 3.6M

SP3782EL-253 3782EL SERIES EXTENDED CABLE 7.5M

Note: The retrofit adaptor allows an existing 3582EL to be upgraded to a 3782EL lock without changing wiring. In installations where a power to open lock (3582ELE) is installed it is recommended to re-wire the door to support 3 wire control.

Alternative Finish Kits

Part Number Finish

3782-FINKITCP* Chrome Plate

3782-FINKITPC Powder Coat

Finish kits include: Strike, faceplate and screws.
Finish kits are not suitable for use with 25.4mm backset 4782 lock.

*Screws not included.

Selector® 3782EL Short Backset Electric Mortice Locks

Timber Door Fixing Kit

Part Number	Finish
3782-TFKITSS*	Stainless Steel
3782-TFKITCP*	Chrome Plate
3782-TFKITPB	Polished Brass

Timber door fixing kits are not suitable for use with 25.4mm backset 4782 lock.

*Faceplate screws not included

Security Faceplate Screw Kit

Part Number	Application
3782-SECKIT	To suit 3780 Series

Kit contains five replacement faceplate screws with tamper resistant TR20 Torx drive heads.

Selector® 3782EL Short Backset Electric Mortice Locks

Strikes

Part Number	Lip Length A	Strike Length B
3782-STK32XX*	32mm	46.1mm
3782-STK74SS	74mm	88.5mm

To order, add finish code to part number.

XX designates the finish.

SS - Stainless Steel, **CP** - Chrome Plate, **PB** - Polished Brass.

32mm length strike supplied as standard.

Fabricator Strikes

Part Number	Lip Length A	Strike Length B
3782-FSTK32SS	32mm	47.2mm
3782-FSTK64SS	64mm	80.2mm

Stainless Steel D shaped strike with retained strike box allows for surface mounting of strike on frame stile where door gap permits.

Selector® 3782EL Short Backset Electric Mortice Locks

Rebate Kits

Part Number	Finish
5782-RK ##CP	Chrome Plate
5782-RK ##SS	Stainless Steel
5782-RK ##PB	Polished Brass

Rebate kits to suit 13mm rebated timber doors with minimum backset of 30mm.

To order, add door handing to part number.

Refer to door handing guide at the bottom of page.

designates door handing.

Power Transfer Lead Covers

The LC8810 and LC8811 Power Transfer Lead Covers are designed to ensure unbroken transfer of wires between door and frame in electric locking situations.

Features

- Provides unbroken connection from controller to lock, for cable up to 8 mm diameter
- Vandal-resistant chrome plated flexible steel
- Completely concealed when the door is closed

Applications

LC8810

The LC8810 is a shorter unit suitable for hinged doors which open to 90° (maximum of 120°).

LC8811

The LC8811 is designed for use on doors which open more than 120°, or have a gap from pin hinge to door frame of more than 20 mm.

Note: Not suitable for centrally pivoted doors.

Standards and Compliance

Successfully fire rated up to 4 hours on fire door assemblies in accordance with AS1905.1. 2005 (Part 1: Fire Resistant Doorsets)
