# Onyx Patio Sliding Door Lock

The Lockwood Onyx Patio Sliding Door Lock incorporates advanced security and safety features making this product the ideal choice for sliding patio door applications.

## Style and Function

This range takes design cues from contemporary architectural styling and complements several of Lockwood's most popular levers to provide a harmonious look and feel throughout the home.

The functionality of the range has been enhanced by the intuitive operation of the unique sliding snib and the innovative LockAlert® feature that indicates the lock status at a glance.

## Application

Surface mounted lockset suitable for use with most aluminium and timber sliding doors.

The flexible chassis coupled with innovative design features results in a non-handed product that is extremely easy to install and suitable for new and most retrofit applications.

## Product Range

A wide selection of furniture options are available in the range to suit various sliding door applications. The range includes internal D handles and slim pulls and a variety of external furniture and strike options.

**DualSelect®**  
Turn the key for safety mode. Turn the key further to select secure mode.

**Twin Locking Beaks**  
For added security.

**LockAlert®**  
Interior Indicator shows lock status at a glance.

**Secure Mode**  
Securely locked from both inside and outside. For when nobody is home.

**Door Close Detect (DCD)**  
Anti slam feature protects from accidental damage and ensures door is closed before being latched or locked.

**2 Keys Included**  
Can be keyed alike to other Lockwood door locks.

^ Part number convention is for reference only, not all possible combinations will be available as a pre packed lockset. Some configurations will need to be made up of sub-assemblies. i.e. Two or more line items may be required to make up desired configuration.

# LW9 Patio Sliding Door Lock

The Lockwood LW9 Patio Sliding Door Lock is a new surface mounted, Twin-beak Patio Sliding Door Lock incorporating sleek and modern styling with an innovative snib design that is both ergonomic and intuitive in operation.

## Style and Function

The patented snib operation is the standout feature of this lock. A smaller handle inside the D-handle, the snib lock is used for Safety Mode locking. It unlocks the door when pulled in the opening direction and locks when pushed in the closing direction, making it possible for one fluid motion to unlock-open and close-lock. Aside from the ease of operation, the snib-lock also becomes an easy, yet subtle visual indicator of lock status. The lock can be further deadlocked to Secure Mode with the key.

The range is styled with minimalistic and universally appealing lines allowing it to cleanly match to just about any other styling in the home.

## Application

Surface mounted lockset suitable for use with most aluminium and timber sliding doors.

The flexible chassis coupled with innovative design features results in a non-handed product that is extremely easy to install and suitable for new and most retrofit applications

## Product Range

The range comes with an internal D Handle and an external Pull handle with the options for a Universal or Wide Strike, and is available in our most popular colours.

### DualSelect®

Turn the key for safety mode (Day Latching). Turn the key further to select secure mode (Deadlocking).

**Twin Locking Beaks**  
For added security.

### Secure Mode

Securely locked from both inside and outside. For when nobody is home.

### Door Close Detect (DCD)

Anti slam feature protects from accidental damage and ensures door is closed before being latched or locked.

**2 Keys Included**  
In locking version.

For other configurations relating to cylinder options, as well as possible key-coding options, please contact your preferred distributor.

The Part Number Matrix below is included here for reference for understanding the different designations, but as noted, not all configurations may be available.

For example:

Product Family	Product Variation	Product Function	Strike	Finish
LW9	1	4	U	BLK

Product Family	Product Function	Strike
Sliding Patio Door Lock	No Cylinder 0	No Strike X
LW9	Inside Cylinder 3	Universal 15.8mm Strike U
	Double Cylinder 4	Wide 25mm Cross Fixing Strike W
	Dummy Function (No Locking) 5	
	External Cylinder 6	

Product Variation	Finish
D Pull Only (No Outside Handle) 0	Black BLK
D Pull Inside (Slim Pull Outside) 1	Silver SIL
No D Pull Inside (Slim Pull Outside Only) 2	White WH
No Furniture X	

^ Part number convention is for reference only, not all possible combinations will be available as a pre packed lockset. Some configurations will need to be made up of sub-assemblies. i.e. Two or more line items may be required to make up desired configuration.

# Cavity Sliding Door Locks

Lockwood's sliding door lock range is possibly the most innovative and aesthetically pleasing lock for a cavity sliding door in Australia. Combining elegance and ease of use, the Lockwood Cavity Sliding Door Lock range is ideal for any home décor and security solution.

Not only will the internal bathroom or lounge room sliding door have a contemporary look, but the interconnecting door from the garage to the laundry can be fitted with a key lockable entrance-set for security.

## Features and Specifications

- Fitted flush against the panel of the sliding door for full recess into the door cavity
- Entrance, Privacy, Passage and Passage Latch models available for the complete residential solution

### Retractable door pull

Designed after extensive research, the sliding cavity door lock features an innovative retractable door pull which combines style with functionality.

### Key lockable solution

The key lockable Entrance Set model protects sliding perimeter doors with the added confidence of Australian Standard compliance for AS4145.2-2008: Tested to exceed 30,000 turn cycles withstanding 3 kN of pull force.

# 680 Patio Bolt®

The Lockwood 680 Lockable Patio Bolt is a strong, heavy duty, surface mounted product designed to improve security in a range of residential sliding and hinge door applications.

It is easy to install and has been designed to suit a wide range of aluminium and timber sliding patio and hinge door applications.

It is offered in chrome plate, satin chrome pearl and a range of powdercoat finishes.

## Keying

### Standard Keying

- Supplied individually keyed with two keys per lock
- 78,000 key combinations
- Key blank KB2015P

**Kinetic Defence®**  
Bump and pick resistant.

**2 Keys Included**  
Can be keyed alike to other Lockwood door locks.

### Restricted Special Keying

Lockwood locks can be keyed to a number of controlled and/or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication, which can also include specially designed key systems such as master key systems, which allow for different levels of mechanical access control.

Please refer to Lockwood Keying Catalogue or contact your local sales office or customer service for specific information.
