

Securturn™

The Removable Turnknob

Securturn™ MC35L5:

For use with most locks with double cylinders that use standard LW4 keyway

Operation: Securturn can be removed by inserting the release key and withdrawing Securturn™

Application: Provides security with safety by allowing immediate exit when Securturn™ installed in inside cylinder

- Notes:**
- Store Securturn™ in a safe place when not in use
 - Securturn™ must be vertical before inserting release key

Insert Securturn™ in inside cylinder

Use release key to remove Securturn™

Operating Instructions

Safety Note

Opening of the release key has been made difficult, as a child safety feature. It opens in a similar way to a pocket knife.

Inserting Securturn™

Using Securturn™

Removal of Securturn™

Safe Plug

In commercial premises and in some domestic situations, a permanent Thumbturn may be required. The Red Safe Plug supplied with every Securturn™ can be inserted (with Securturn™ disassembled) into the release key slot (from the inside). With Safe Plug in place Securturn™ can not be removed (except by a locksmith).

Securturn™ Applications

Securturn can be used to add safety with security to many types of locks, using lock cylinders shown here, with the common LW4 Australasian keyway.

One Key Security

Cyl4® One Key Security CYL4®: With One Key Security you can use a single key to operate all the locks in your home. This lock can be supplied keyed alike in any quantity and keyed alike to a variety of ASSA ABLOY locks including most similar products of other makes. Get one key convenience simply by asking your retailer.

Euro Cylinder Note

A feature of Securturn™ when used in Euro cylinders is that key access from outside will be prevented by turning Securturn™ from the correct vertical position. See diagram.

Because of the above feature do not leave Securturn™ in the inside cylinder of the main access door as key entry could be prevented.

Preparing Securturn™ For Other Locks

Your local locksmith will prepare the Securturn™ key to your current keys cuts. Securturn™ can be used on your inside lock cylinder fitted with a standard LW4 keyway.
